DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert Kuan, 56,668 on 4/28/06.

The application has been amended as follows:

Claim 14, A computer program **stored on a computer storage medium** that provides device type information using a Fibre Channel network, comprising:

a code segment that obtains device type information for a device coupled to a Fibre Channel based network;

a code segment that constructs an address database having a device entry for the device, wherein the device entry includes a device address and the device type information, the device includes a device address and the device type information, the device address associating a Fibre Channel Address with a SCSI-based address, the SCSI-based address comprised of a port target identifier(port target ID) and a logical unit identifier (LUN ID), wherein the address database facilitates translation of an operating system independent command received by a Fibre Channel wrapper module into a Fibre Channel command usable by a Fibre Channel layer module that is in

communication with a Fire Channel controller, the operating system independent command being a Common Hardware Interface Module (CHIM) command;

a code segment that receives a request for the device type information from a SCSI-based network application, wherein the request includes the SCSI-based address; and

a code segment that returns the device type information and the Fibre Channel Address associated with the SCSI-based address to the requesting SCSI-based application.
